MODERN TECHNOLOGY COMBINED  
WITH BEAUTIFUL CLASSIC DESIGN

## THE ULTIMATE FREEDOM

---

At Carice we enjoy driving and we want to share that passion with you. The all new electric TC2 is the ultimate car to enjoy that sunny day and unwind.

The Carice is elegant and at the same time uncomplicated. It handles phenomenal and delivers driving in its most elementary form.

Being a compact two-seater, the TC2 combines the experience, look and feel of a classic car with new and exciting technologies. With the innovative electric powertrain, the Carice TC2 is ready for the 21<sup>st</sup> century without missing out on a classic and pure driving experience.

## 100% ELECTRIC

---

The retro style of the TC2 might suggest otherwise, but the Carice TC2 is fully electric and has no emissions. This car is made to be fun for everybody, not just the driver.

The TC2 features a motor with a peak power of 41 kW and the innovative battery technology combined with the low weight allows you to reach up to 300 km on a single charge with the large battery pack configuration.

To maintain the sleek lines of the TC2, the charging port is placed inside the rear cargo space. There is no plug sticking out of the car when the tailgate is closed during charging.

## ELEGANCE

---

What fun is there in driving a car designed in a spreadsheet? The Carice is built to be driven: extremely lightweight, compact, responsive and elegant. When you get into your TC2, you forget about the everyday hassle. Just relax and enjoy the drive.

With its round surfaces and curves, the Carice TC2 looks both sensuous and dynamic: pure elegance on wheels.

This innovative compact car suits people who are not afraid to try something new and stand out. Whether you're out for a drive to the beach, zipping through the countryside or driving in a city, with a Carice you always drive in style.

## FEATHERLIGHT

---

The TC2 is developed from the ground up as an electric car, which allowed for engineering an extremely lightweight and rigid chassis around a uniquely positioned battery pack in the center of the car, keeping a low seating position.

The Carice features smart weight saving solutions and a lightweight bodywork. By developing the suspension in-house as well and choosing components thoroughly, the TC2 weighs in at a mere 630kg.

Due to this power train configuration and rear-wheel drive lay-out, the TC2 has a low center of gravity and good weight distribution, delivering a very dynamic yet comfortable drive.

## MODERN CLASSIC

---

When getting into the TC2 you are embraced by the chic handcrafted interior. By removing what you don't really need, you will get back to the essence of driving.

From the eye-catching dashboard, the classically styled steering wheel to the matching upholstery and striking details: everything in a Carice is made to stand out in all its simplicity.

Every detail reflects the effort that has been put in to make something special. With a Carice you don't just own another car: you own something extraordinary, a piece of art.

## HIGH TECH CRAFTSMANSHIP

The Carice is engineered, designed and developed in the Netherlands and manufactured by a team of people with a lifelong love of cars and technology.

This passion for cars translates into a high level of attention to detail and commitment to meet your needs.

By combining craftsmanship with advanced technologies in our factory, exceptional quality is achieved.

# COLORS

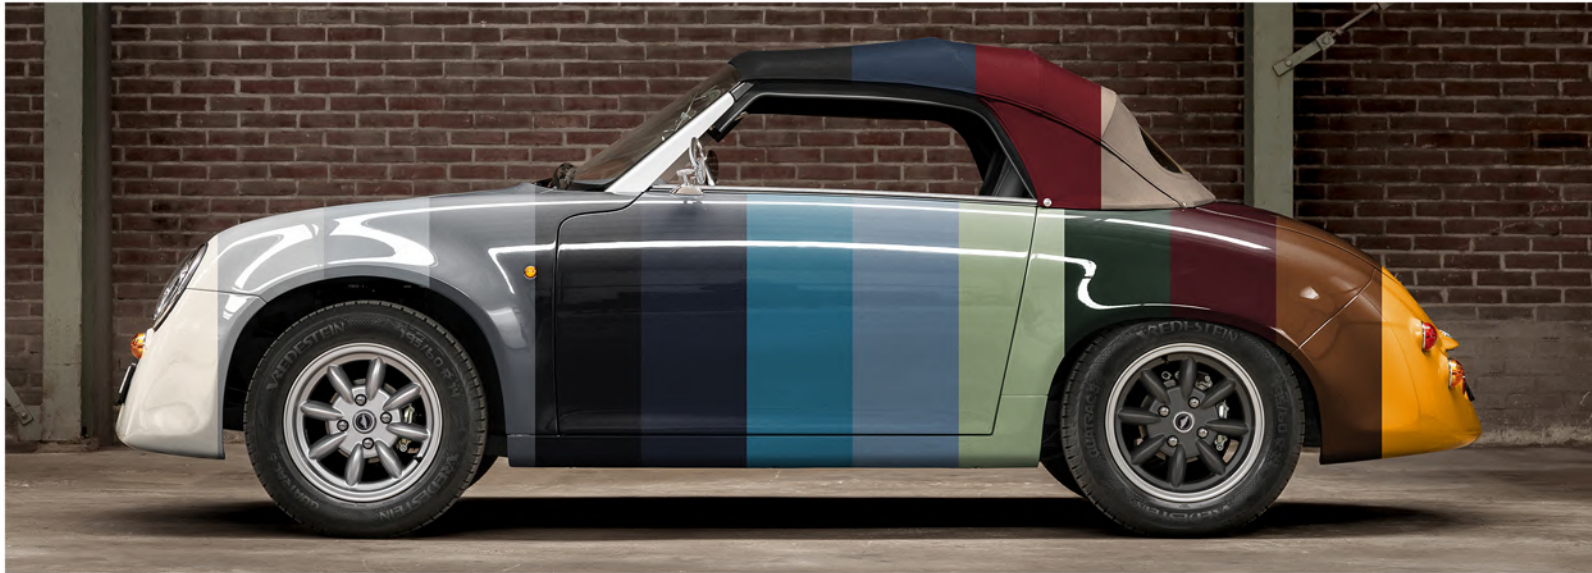

The TC2 is available in a wide range of colors and combinations. For a sporty look you can also opt for dark-colored headlights, anthracite alloy rally wheels and racing stripes. There is always a combination that fits you!

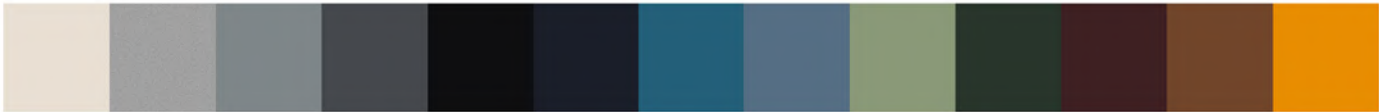

INTERIOR UPHOLSTERY

SOFT TOP ROOF

EXTERIOR PAINT

*please note that different devices, screens and prints display colors differently*

## OPTIONS

### LARGER BATTERY PACK

With the standard battery pack you can reach up to 200 km on a single charge. If you want to make longer trips or charge less often, the large battery pack configuration increases the range to 300 km. This larger battery does not affect cargo space.

### SOFT TOP ROOF

The Carice TC2 is a roadster, which is historically a two-seater without a roof. This adds to a pure and exciting driving experience. However, you can opt for a manually retractable soft top roof to protect you from the weather.

### SIDE WINDOWS

Additionally the TC2 can be fitted with side windows that can simply be mounted on top of the doors and be removed easily as well.

*Additional options can be found in the pricelist.*
